

Neighbourhood: Louvre

Number of bedrooms: 0

Number of bathrooms: 0

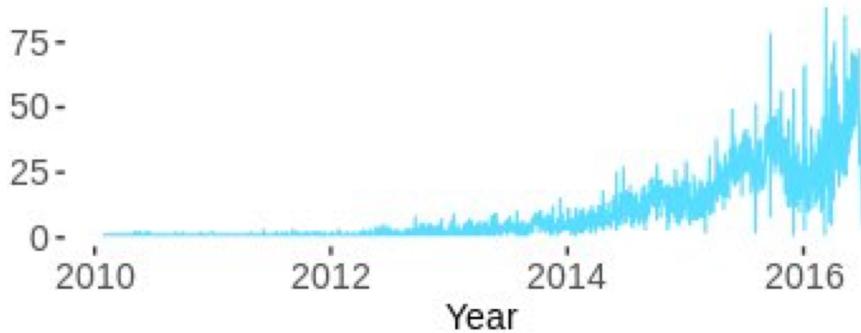

interface to select 3 # criteria
No range here f a bedrooms /bathrooms
as this is not a "search map" but
rather to see how each number impact
on price

Distribut° of the "whole populat°": if
data are present f a the specific
Neighbourhood and # of bathrooms
and bedrooms, two histograms will
appear so that you can compare the
distribut° of the sample against
the total.

Rented Apartment

Time-Series Analysis by neighbourhoods

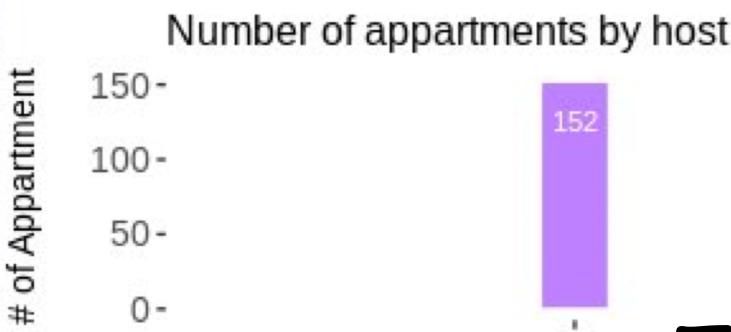

Time Series:

Select one quarter
and observe the
of visits

Hosts_id:

→ Select one host (with its id)

2288803

and observe the
number of
apartments he
owns.

For the app we just selected host with more than
5 apartments Below applied bugs and
could not load on my computer.
